

Moulure wall light

 Collection: Moulure

The Dé-Moulures are in keeping with José Lévy's Parisian roots and Haussmann heritage. In a work of "deconstruction" of this iconic style, the designer has used the ornamental motif of interior moldings to sculpt the base of these sconces or table lamps. By affixing an opal glass head to this architectural base, the designer amplifies the charisma of these lamps, which echo the idea of inhabited form.

In this range, only the Haussman wall light is available in Satin Brass
