

# Suspension Calée V5

Collection: Caleé

An alphabet of shapes, the Calé(e) collection is a geometric game in which the sense of imbalance forms simple, linear and refined objects.

Several hanging lights can be combined in a single pavilion, either circular or rectangular. The rectangular version can be adapted to any length. The circular version has a maximum diameter indicated on the downloadable sheet. The standard cable length is 2 metres, but this can be reduced during installation. For more information, please contact us. The small disc on the underside will always be in finish 1.
